September 3. New case plague Lombard street; one case Francisco street. Total cases to date, 17; total deaths, 7.

September 4. No new cases. One death to-day. Total cases to date, 17; total deaths, 8.

Measures for preventing spread of plague at San Francisco.

In order to prevent the spread of bubonic plague from San Francisco to coastwise cities of California and other States on the Pacific coast and to foreign ports, a plan has been arranged, after consultation with the authorities in San Francisco, for fumigation with sulphur for the destruction of rats on all outgoing vessels from San Francisco, the work to be carried on by the quarantine officers of the Public Health and Marine-Hospital Service. By direction of the Secretary of the Treasury the revenue cutters *Golden Gate* and *Hartley* are to aid in carrying men and material for the fumigation of vessels in San Francisco Harbor.

Under date of September 4 Passed Assistant Surgeon Hobdy wires that the work of disinfection begun September 2 was in full operation September 3.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES OF THE UNITED STATES—UNTABULATED.

CALIFORNIA.—Month of July, 1907. Estimated population, 2,001,193. Total number of deaths reported to the State board of health, 2,540, corresponding to an annual death rate of 14.2 per 1,000 population. Deaths from contagious diseases were as follows: Diphtheria 34, enteric fever 54, measles 17, scarlet fever 7, smallpox 2, whooping cough 22, and 367 from tuberculosis.

FLORIDA.—Reports to the State board of health for the week ended August 24, 1907, show as follows: Diphtheria—*Branford*, 1 case. Enteric fever—*Jacksonville* and *Daytona*, each 2 cases. Malarial fever—*Jacksonville* and *Daytona*, each 1 case. Tuberculosis—*Jacksonville*, 3 cases; *Palatka* and *Stuart*, each 1 case.

ILLINOIS—*Aurora*.—Month of June, 1907. Estimated population, 30,000. Total number of deaths, 53, including enteric fever 1, scarlet fever 3, and 2 from tuberculosis. Cases: Diphtheria 1, measles 3, scarlet fever 22, and smallpox 18.

IOWA—*Keokuk*.—Month of July, 1907. Estimated population, 16,000. Total number of deaths, 26, including measles 1, and 2 from tuberculosis. Cases: Smallpox 2.

MICHIGAN.—Month of July, 1907. Estimated population, 2,611,792. Total number of deaths returned to the State department for the month was 2,591, including enteric fever 37, diphtheria 15, scarlet fever 8, measles 10, whooping cough 18, and 227 from tuberculosis. The total number of deaths from all causes corresponds to an annual rate of 11.7 per 1,000 estimated population.

MINNESOTA.—Month of June, 1907. Estimated population, 1,979,658. Reports to the State board of health show as follows: Total number of deaths, 1,125, including diphtheria 29, enteric fever 5, measles 8, scarlet fever 10, smallpox 2, whooping cough 5, and 122 from tuberculosis. Deaths reported from State institutions during the month numbered 27, including 3 from tuberculosis.

Minneapolis.—Month of July, 1907. Estimated population, 285,000. Total number of deaths, 194, including diphtheria 1, enteric fever 5, whooping cough 2, and 28 from tuberculosis. Cases: Diphtheria 26, enteric fever 8, scarlet fever 12, smallpox 18, and tuberculosis 18.

NEW YORK—*Troy*.—Month of July, 1907. Estimated population, 76,861. Total number of deaths, 136, including diphtheria 2, enteric fever 2, scarlet fever 2, and 20 from tuberculosis. Cases: Diphtheria 13, enteric fever 4, measles 1, scarlet fever 5, and tuberculosis 32.

OHIO—*Columbus*.—Month of June,[a] 1907. Estimated population, 185,000. Total number of deaths, 184 (24 nonresidents), including enteric fever 2, diphtheria 2, and 21 from tuberculosis. Cases: Diphtheria 7, enteric fever 15, measles 82, scarlet fever 11, smallpox 3, whooping cough 17, and tuberculosis 22.

PENNSYLVANIA—*Scranton*.—Month of June, 1907. Estimated population, 125,000. Total number of deaths, 121, including diphtheria 6, measles 1, enteric fever 1, and 6 from tuberculosis. Cases: Tuberculosis 9. Month of July, 1907. Total number of deaths 180, including diphtheria 1, enteric fever 2, measles 1, scarlet fever 1, and 12 from tuberculosis. Cases: Tuberculosis 5.

---

[a] For month of July, 1907, see Public Health Reports, August 23, 1907.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, June 28 to September 6, 1907.

[For reports received from December 28, 1906, to June 28, 1907, see PUBLIC HEALTH REPORTS for June 28, 1907.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

FOREIGN AND INSULAR.

CURRENT QUARANTINE MEASURES.

[From the Veröffentlichungen des Kaiserlichen Gesundheitsamtes, Berlin, August 21, 1907.]

CHINA.—July 6. The German consul at Chefoo, in concert with the consular representatives of the treaty powers and with the cooperation of the local maritime customs officers, has issued an ordinance for preventing the importation of plague from Hongkong into Chefoo.

RUSSIA.—August 8. The plague commission has suspended the special measures adopted on account of the presence of 8 plague suspects at Peschtschanka, district of Zarizyn, government of Saratow, but enforces rigorous sanitary inspection in the district and government named.

ROUMANIA.—August 8. Measures against arrivals from Odessa suspended.

TURKEY.—August 10. Arrivals from Beirut subject to medical inspection.

AFRICA.

Report from Cape Colony—Plague at King Williams Town—Examination of animals for plague infection.

The following report on the outbreak of plague at King Williams Town is received from the medical officer of health for the colony under date of July 22:

No case of plague in man was discovered during the week. Two cases were discharged cured, and 3 cases now remain under isolation and treatment.

During the week 96 rats (including 46 found dead), 20 mice (including 14 found dead), and 4 cats (including 3 found dead) were examined, of which 3 mice and 2 cats were found to be plague infected and 45 rats, 10 mice, and 2 cats to be probably plague infected.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Mengis reports as folows: Week ended August 22, 1907. Present officially estimated population, 10,500. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
Aug. 16	Origen	New Orleans	29	5	0
18	Osceola [a]	Boston	30	0	0

[a] Steamship *Osceola* had 67 laborers in transit from and to Inagua.

Aliens sailing for United States ports during the week, 2.

CHINA.

Report from Hongkong—Quarantine restrictions—Plague and smallpox.

Passed Assistant Surgeon White reports, June 29 and July 6:

Week ended June 29, 1907. Restrictions enforced by Hongkong remain as reported on June 1, 1907. Restrictions enforced against Hongkong remain as reported on June 1, 1907.

Return of communicable diseases: Plague, 20 cases, 21 deaths; smallpox, 4 cases, 3 deaths.

Week ended July 6, 1907. Restrictions enforced by Hongkong as reported on June 1, 1907, have been withdrawn.

To restrictions enforced against Hongkong as reported on June 1, 1907, the following have been added:

Place or port.	Nature of measure.
Shanghai. All American ports, including Philippine Islands.	Hongkong declared an infected port. 1. Before sailing from Hongkong. (*a*) Fumigation of vessel, after dry docking to kill rats and insects. (*b*) Disinfection of luggage of steerage passengers and forecastle crews. (*c*) Certification of shipping orders at American consulate, for following cargo: Household goods, personal effects, used bedding, garments, gunnies, bags, sacks, matting, and embroideries; rags, wool, furs; fresh fruits, vegetables, milk and butter; potted flowers and plants; dogs, cats, poultry, and other small animals; feathers, hair bristles, hides, horns, hoofs, claws, bone, manure, earth, corpses. (*d*) Ship's supplies: Water, to be taken from the Colony's filtered supply; ballast, only hard rock, clean sea beach sand, or sea water allowed; vegetables, milk, butter, etc. Sources not restricted unless cholera is present. 2. At ports of arrival. (*a*) Medical inspection, but no detention of vessel unless quarantinable disease is found aboard, or has occurred en route.
Panama	Same as at all American ports and the Philippine Islands.
Chefoo	Hongkong declared an infected port.
Ceylon	Do.
Newchwang	Do.

Return of communicable diseases: Plague, 25 cases, 25 deaths; smallpox, 2 cases, 2 deaths.

Report from Shanghai—Inspection of vessels—Smallpox—Foochow and Amoy declared plague infected.

Acting Assistant Surgeon Ransom reports, July 30:

Week ended July 27, 1907. One original and 3 supplemental bills of health granted to 4 steamships; 3 vessels, 228 crew, 13 cabin

and 5 steerage passengers inspected; 1 case of illness on board investigated; manifests viséed for 8,558 packages of freight; 3 pieces of baggage disinfected; 1 emigrant for San Francisco per steamship *Asia* was recommended for rejection on account of trachoma.

The report of the municipal health department shows among foreigners 1 new case of smallpox; among natives 26 deaths from smallpox.

No quarantinable diseases were reported from outports, but Foochow and Amoy have been declared plague infected by the authorities here.

Cholera and smallpox at Shanghai.

The following is received from the Department of State, under date of August 30:

A telegram of the 26th instant from the consul-general at Shanghai states as follows:

"Deaths week ending August 25, cholera 159, smallpox 20."

COLOMBIA.

Reports from Cartagena—Inspection of vessels—Sanitary conditions—Smallpox and dengue fever present.

Acting Assistant Surgeon Jacobs reports, July 23 and August 14:

Week ended July 23, 1907. The sanitary conditions of Cartagena and surrounding country are fair.

Schooner *Orleans* and steamship *Prinz Joachim* cleared before my arrival. Steamship *Chancellor*, for Galveston via Colon, Panama; officers 8, crew 32, inspected.

Passengers from this port, 16; in transit, none.

One passenger landed at this port.

No quarantinable disease has been reported during the week ended July 23, 1907.

NOTE.—For report for August 6 see Public Health Reports, August 30, 1907, page 1212.

Week ended August 13:

Bills of health issued:	
United States	3
Panama	1
Passengers from this port	56
Passengers in transit	359
Immune certificates issued	2

Sanitary condition of Cartagena and surrounding country, fair. No quarantinable diseases reported by authorities, although smallpox and dengue fever are present.

COSTA RICA.

Reports from Limon, fruit port.

Acting Assistant Surgeon Goodman reports as follows: Week ended August 17, 1907. Estimated population 6,000; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected
Aug. 11	Limon	Boston	46	5	0	0
12	Sarnia	New York	100	10	11	0
14	Ellis	New Orleans	38	1	24	0
15	Bluefields	do	23	6	0	0
16	Banan	Mobile	17	0	0	0
16	Manistee	New York	47	2	0	0
17	Harald	Mobile	18	0	0	0
17	Venus	New Orleans	26	3	0	0

CUBA.

Report from Cienfuegos—Inspection and fumigation of vessels—Yellow fever.

Acting Assistant Surgeon Marsillan reports, August 26:

Week ended August 24, 1907.

Vessels inspected	2
Vessels inspected and fumigated	2
Bills of health issued	4
Crews inspected	151
Passengers inspected in transit	1
Immune certificate issued	1

The British steamship *Min*, from Manzanillo, bound for Mobile, and the Spanish steamship *Juan Forgas*, from Manzanillo, and bound for New Orleans, were both fumigated. On inspection, all temperatures of their crews were found normal. There was one passenger by steamship *Juan Forgas* for New Orleans in transit and in good sanitary condition.

There are now more cases of yellow fever among Spaniards than among Americans. Only one man remains ill among the American troops.

August 28. One death, Spaniard, to-day. Total cases to date, 30; recoveries, 15; total deaths to date, 6; under treatment, 9.

Report from Habana—Yellow fever.

Passed Assistant Surgeon Amesse reports:

August 28. One case yellow fever officially reported at Campo Florida, about 10 miles from Guanabacoa, across bay from Habana. Has been ten months in the island and whole time at Campo Florida.

August 30. One case yellow fever. Spaniard, officially reported city of Habana. Six years in Cuba. Has been living in Vives street. Now in Benefica Hospital. Taken sick August 23.

August 31. Further note case yellow fever Habana. Patient has not been out of city. Striken August 23; removed to Benefica Hospital August 24.

Report from Matanzas—Inspection of vessels—History of yellow fever cases—Sanitary measures.

Acting Assistant Surgeon Nuñez reports, August 20:

Week ended August 17, 1907. Bills of health granted to 4 vessels leaving for United States ports; 1 vessel was fumigated, and 2 health and acclimation certificates were issued to passengers bound to New York via Habana. The vessel fumigated was the Norwegian steamship *Ole Bull*, destined to Mobile, Ala., having a crew of 20, and no passengers. This vessel left August 15 for its port of destination with all well aboard.

August 15–17, 3 new cases of yellow fever were reported, of which 2 contracted the infection at Mocha, within this district, and 1 at Alacranes, a town close to Union de Reyes. The history of these 3 cases is as follows:

(1) G. D., 24 years of age, born in the province of Leon, Spain, arrived in Cuba from his native country one year and nine months ago and at Mocha one month ago, joining the gang of workers at the public road which is being laid at that place. He states not having had any other serious sickness since he came to Cuba. He was taken sick August 11 and was isolated from the rest of his companions and placed under a mosquito net. On the following morning the patient, well protected with a mosquito bar and blanket, was transferred from the camp at Mocha to the civil hospital of this city, where he was lodged in the isolation room for further observation and treatment. This room has been renovated since the recent fatal case of yellow fever occurred, with the installation of new wire netting so as to be mosquito proof.

August 15 the diagnosis of yellow fever was unanimously agreed upon by all the members of the commission. This case recovered and is now convalescing.

(2) R. L., 22 years old, born in the province of Corunna, Spain, arrived in the island from his native country about two years ago and at Mocha but one month ago. During the previous three months and up to the time he came to Mocha he lived in the neighborhood of Union de Reyes. He also joined the same gang of laborers at the new road at Mocha, and roomed with the case just described. He was taken sick August 12 and ordered the same morning, together with his companion, to the city hospital of Matanzas for treatment. L. from the onset, showed a more severe type of the disease, and at the time the commission convened the diagnosis of yellow fever was determined. This case became gradually worse and the patient died August 17. A necropsy was held on the day of death, and the pathological lesions found fully confirmed the diagnosis of yellow fever.

(3) The case of yellow fever reported August 17 at Alacranes occurred in a man, D. M., native of the Canary Islands, living in a plantation colony called Segundo, in the vicinity of the town referred to, being discovered August 16. The case was detected on the fifth day of the disease, and was transferred from the colony to Alacranes, where it is at present isolated in a protected room. The case previously reported in that town, under date of August 9, recovered and has been discharged since. M. is said to have contracted the disease at Alacranes.

An extra sanitary force was ordered to Alacranes, both from Habana and Matanzas, in order to carry out such sanitary measures as are recommended in those cases.

The work of fumigation in the city was discontinued after these sanitary measures were complied with in the infected block of houses where the Hotel Europa is located, and the row of buildings on the opposite side of the street facing the hotel. All the neighborhood surrounding the civil hospital is being fumigated, and the latter building is to be refumigated as soon as the one case of yellow fever, still under treatment at the place, is discharged.

A whole ward of the civil hospital is being protected with wire netting so as to meet properly any emergency that may arise.

The Cuban quarantine officer has been directed to inspect all the coastwise vessels arriving in this harbor, besides those from foreign ports, and to report to the local health officer the nonimmune crews and passengers landing and their stopping places in town, so as to hold them under medical supervision during the period of incubation of yellow fever. Restrictions are also being enforced on travel by land from places known to be infected with the disease.

Report from Santiago—Inspection and fumigation of vessels—Inspection of coastwise vessels and trains arriving from Habana.

Acting Assistant Surgeon Wilson reports, August 20:

Week ended August 17, 1907. Bills of health issued to 9 vessels bound for the United States. The steamship *Niceto*, bound for Tampa, was fumigated to kill mosquitoes.

No quarantinable disease reported.

Since the outbreak of yellow fever at Cienfuegos, the Cuban quarantine service at this port has had orders to inspect all coastwise vessels and to give a list of passengers landed to the chief of municipal sanitation so that he may be able to follow them up.

The trains arriving from Habana are also inspected. For this purpose a medical inspector has been appointed who goes daily to San Luis (30 miles away) to meet the incoming train. He examines passengers and takes temperatures and makes note of them. This will be kept up while the epidemic lasts.

Since the beginning of this month the death rate at Santiago de Cuba has been reduced to normal.

GERMANY.

Report from Berlin—Measures to prevent introduction of cholera from Russia.

The following is received from Consul-General Thackara, under date of August 16:

A conference has just been held at the imperial office of the interior, in which all the interested departments of the Empire and of Prussia participated, with the object of discussing what special regulations, if any, were necessary to prevent the introduction of cholera from Russia into the German Empire. It was decided to adopt such

precautions as will enable the immediate putting into effect of the regulations successfully employed at the time of the outbreak of cholera in the autumn of 1905, especially the supervision of the rivers near the frontier.

Report from Bremen—Quarantine of emigrants from Russia on account of cholera in the trans-Volgian districts.

Consul Fee reports, August 14:

Owing to the epidemic outbreak of cholera in the trans-Volgian districts of Russia, and especially in the cities of Samara, Saratoff, and Astrachan, the board of health of the city and State of Bremen has issued an order whereby all emigrants coming directly or indirectly from Russia are put under quarantine for five days. Their baggage is disinfected, and every precaution is taken to prevent a spread of the disease.

GUATEMALA.

Report from Livingston—Inspection of vessels.

Acting Assistant Surgeon Wailes reports as follows: Week ended August 21, 1907. Present officially estimated population, 3,500. General sanitary condition of this port and the surrounding country during the week, fairly good. No quarantinable disease.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 20	Anselm	New Orleans	42	0	0	0
21	Belize	Mobile	17	0	0	0

HAWAII.

Report from Honolulu—Outgoing quarantine transactions.

Chief Quarantine Officer Cofer reports, August 11:

Week ended August 10, 1907.

Vessels inspected and bills of health issued	6
Vessels disinfected and bills of health issued	1
Cabin passengers inspected	20
Steerage passengers inspected	9
Crew inspected	52
Pieces of baggage for crew disinfected	65

Infected rats found near Hilo and at Aiea, in the vicinity of Honolulu.

Passed Assistant Surgeon Ramus reports:

September 1. Rats near Hilo and at Aiea, near Honolulu, infected.

HONDURAS.

Report from Ceiba, fruit port.

Acting Assistant Surgeon Reynolds reports as follows: Week ended August 18, 1907. Present officially estimated population, 6,500. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Aug. 12	Rosina	28	2	0	0

INDIA.

Report from Calcutta—Transactions of Service—Cholera, plague, and smallpox.

Acting Assistant Surgeon Eakins reports, August 1:

Week ended July 27, 1907. Bill of health issued to the steamship *Bloemfontein*, bound for Boston and New York with a total crew of 66; and to the steamship *Reichenfels*, bound for Philadelphia and New York with a total crew of 67. The usual precautions were taken—holds fumigated, rat guards placed on wharf lines, and effects of Asiatics disinfected.

Week ended July 20, 1907. Thirty-eight deaths from cholera, 11 from plague, and 4 from smallpox in Calcutta.

In Bengal, week ended July 13, 1907, 46 cases and 40 deaths from plague. In India, during week ended July 20, 1907, 3,411 cases and 2,760 deaths from plague.

ITALY.

Report from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.

Passed Assistant Surgeon Foster reports, August 12:

Vessels inspected at Naples, Messina, and Palermo, week ended August 10, 1907.

NAPLES.

Smallpox.—Week ended August 8, 1907. Cases: Belluno 1, Voltri (Genoa) 1, Latronico 1, Venosa 2, Roccanora (Potenza) 1, Castelvetrano (Trapani) 1.

Week ended August 15, 1907. Cases: Viterbo (Rome) 4, Scoppito (Aquila) 2, Aliamo (Trapani) 1.

JAPAN.

Report from Yokohama—Inspection and fumigation of vessels—Plague conditions improved—Plague in Formosa.

Passed Assistant Surgeon Cumming reports, July 24:

Week ended July 20, 1907. Bills of health issued to 5 vessels having an aggregate personnel of 1,380 passengers and 196 crews.

One steamship, the *Pathan*, bound hence to New York, was fumigated throughout by this office for the purpose of destroying vermin.

No additional cases of plague have been reported and the general conditions are very much improved. A general cleaning of the town is now going on.

Emigrants recommended for rejection.

Number of emigrants per steamship *Persia* recommended, August 7, 1907, for rejection: For San Francisco, via Honolulu, 1.

Per steamship *Kaga Maru*, August 7, 1907: For Seattle, 27.

These rejections were all for trachoma.

MADAGASCAR.

Report from Tamatave—Plague at Majunga.

The following is received from the Department of State, under date of August 26:

"The Department has received a cablegram from the American consul at Tamatave, Madagascar, dated the 26th instant, reading as follows: 'Bubonic plague Majunga.'"

MEXICO.

Reports from Progreso—Inspection and fumigation of vessels—Sanitary conditions satisfactory.

Acting Assistant Surgeon Harrison reports, August 10 and 18:

Period from July 27 to August 10, 1907. No quarantinable disease has appeared anywhere in the State according to authentic reports. General sanitary conditions have been satisfactory and measures against yellow fever appear to be carried out systematically and persistently here and in Merida. Rains continue, but there is no apparent increase in the number of mosquitoes.

During the period of this report 8 steamers and 1 sailing vessel, carrying in crews 415 persons and as passengers 103 persons, were dispatched from this port. Of these vessels, 4 sailing for Gulf ports were fumigated.

Week ended August 17, 1907. No quarantinable disease was reported, and general health conditions remain unchanged. Four steamships, carrying 53 persons as passengers and 214 as crews, received bills of health from this port. One vessel was fumigated.

Report from Salina Cruz—Inspection and fumigation of vessel.

Acting Assistant Surgeon McPherson reports, August 16:

Period from August 1 to 15, 1907, inclusive. The steamship *Alaskan*, of the American-Hawaiian Steamship Company, left this port August 4 for San Francisco, Cal., and while in the roadstead outside the harbor was fumingated throughout with sulphur gas, according to regulations.

Reports from Veracruz—Inspection and fumigation of vessels—Sanitary conditions.

Acting Assistant Surgeon Frick reports, August 5 and 19:

Week ended August 3, 1907: August 1. Fumigated the American schooner *Olga*, bound for Pascagoula, with 8 in crew; vessel sails in ballast, with time of last exposure 6.35 a. m. Inspected the American steamship *Merida*, bound for New York via Progreso, with 129 in the crew, 79 cabin, and 14 steerage passengers; vessel sails in general cargo. Fumigated the Norwegian steamship *City of Tampico*, bound for New Orleans, with 20 in the crew and 3 passengers; vessel sails in small cargo, with time of last exposure 2.20 p. m.

August 2. Inspected the British steamship *Logician*, bound for Pensacola via Puerto Mexico, with 40 in the crew; vessel sails in the remainder of a European cargo. Inspected the British steamship *Fernfield*, bound for a United States port via Morro Castle, for orders, with 27 in the crew; vessel sails in ballast.

August 3. Fumigated the Mexican steamship *Oaxaca*, bound for Mobile, with 26 in the crew and 5 passengers; vessel sails in ballast, with time of last exposure 9.20 a. m. Fumigated the British steamship *Cynthia*, bound for Tampa, with 26 in the crew; vessel sails in ballast, with time of last exposure at 9.50 a. m. A bill of health was issued the Norwegian steamship *City of Mexico*. A bill was also issued the British steamship *Rosefield*.

No quarantinable disease reported during the week. The situation continues favorable.

Week ended August 17:

August 14. Inspected the British steamship *Russian Prince*, bound for Philadelphia, with 26 in the crew; vessel sails in a partial cargo of old oil barrels. Fumigated the British steamship *Gulf of Ancud*, bound for Port Inglis, with 27 in the crew; vessel sails in ballast with time of last exposure at 8.30 a. m.

August 15. Fumigated the German steamship *Tilly Russ*, bound for Galveston, with 19 in the crew; vessel sails in a general cargo from Tampico, destined for Europe; time of last exposure, 8.10 a. m. Fumigated the Norwegian steamship *Norheim*, bound for New Orleans, with 19 in the crew and 3 passengers; vessel sails in a small general cargo, with time of last exposure at 8.50 a. m. Inspected the American steamship *Mexico*, bound for New York via Progreso and Habana, with 128 in the crew, 88 cabin and 16 steerage passengers; vessel sails in general cargo.

August 16. Fumigated the Danish steamship *Nordhavet*, bound for Sabine Pass, with 24 in the crew; vessel sails in ballast, with time of last exposure at 4.05 p. m.

August 17. Inspected the German steamship *Forstech*, bound for Galveston via Coatzacoalcos and Progreso, with 27 in the crew; vessel sails in the remainder of a European cargo. Inspected the British steamship *Cedar Grove*, bound for Texas City via Mexican ports, with 25 in the crew; vessel sails in the remainder of an American cargo.

PANAMA.

Reports from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows:

Week ended August 11, 1907. Present officially estimated population, 4,954. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

PERU.

Reports from Callao—Inspection of vessels—Plague in Peru—Plague and smallpox in Chilean ports.

Assistant Surgeon Wightman reports, July 30 and August 3 and 12:

Week ended July 27, 1907. Vessels dispatched as follows:

July 24. The Chilean steamship *Tucapel* for Ancon, Canal Zone, with general cargo and a total personnel of 128, of whom 3 members of crew, 20 cabin, and 5 steerage passengers were from this port.

July 26. The British steamship *Belle of Scotland* for New York, with general cargo and a total personnel of 61, none from this port.

July 27. The British steamship *Quilpue* for Ancon, Canal Zone, with general cargo and a total personnel of 205, of whom 3 members of crew, 49 cabin, and 53 steerage passengers were from this port.

Plague in Peru is reported by the Director de Salubridad as follows:

Locality.	Cases July 18.	New.	Recovered.	Died.	Remaining July 24.
Lima	4	3	2	2	3
Callao	6			1	5
Trujillo	24	8	7	6	19
Mollendo	1				1
Chiclayo	2				2
Ferrenafe		1			

The patient at Ferrenafe escaped from the authorities, so that the result of the case is not known.

Bills of health from Chile report: Antofagasta, 4 cases of plague with no death in 2 weeks ended July 18; Arica, 7 cases of plague with no death in 2 weeks ended July 20; Iquique, smallpox still present. Peruvian authorities confirm the existence of plague in Pisagua, Chile, reported by me last week on the authority of ship's officers.

Week ended August 3, 1907. Vessels dispatched as follows:

July 28. The British steamship *Cumbal* for New York, with general cargo and a total personnel of 34, of whom 1 member of crew was from this port.

July 28. The British steamship *Planet Venus* for New York, without cargo or passengers for the United States, with a crew of 54, 6 members of which were from this port.

The Director de Salubridad reports plague in Peru as follows:

Locality	Cases, July 25.	New.	Recovered.	Died.	Remaining, July 31.
Lima	3	2	1	1	3
Chosica		1			1
Callao	5		3		2
Trujillo	19	4	5	3	15
Chiclayo	2				2
Mollendo	1		1		
Piura		5			5
Querecotillo		1			1

Piura and Querecotillo are both on a railroad inland from the port of Paita.

Week ended August 10. Vessels were dispatched as follows:

August 4. The British steamship *Coya* for New York with general cargo and a total personnel of 48, of whom 3 members of crew and 8 cabin passengers were from this port.

August 5. The British steamship *Chipana* for New York with general cargo and a crew of 69; no passengers.

August 8. The Chilean steamship *Mapocho* for Ancon, Canal Zone, with general cargo and a total personnel of 262, of whom 5 members of crew, 71 cabin, and 94 steerage passengers were from this port.

The following is the latest report on plague in Peru received from the Director de Salubridad:

Locality.	Cases Aug. 1.	New.	Recovered.	Died.	Remaining, Aug. 7.
Lima	3		2		1
Callao	2	1			3
Chosica	1				1
Trujillo	15	9	2	6	16
Chiclayo	2				2
Piura	5			1	4
Querecotillo	1		1		

PHILIPPINE ISLANDS.

Reports from Manila—Inspection of vessels.

Chief Quarantine Officer Heiser reports, July 10 and 19:

Week ended July 13, 1907. No quarantinable diseases reported in the city of Manila.

No consular bills of health issued at Manila to vessels proceeding to the United States or its insular possessions.

Week ended July 6, 1907. No quarantinable disease reported for the city of Manila.

Consular bills of health issued as follows:

On July 2 the German steamship *Christiania*, with 44 crew and 1 cabin passenger, en route to Marseille via Cebu, was granted a supplemental bill of health.

On July 6 the German steamship *Fiume*, with 34 crew, en route from Veclono, Labuan, to Iloilo, was granted a supplemental bill of health.

WEST INDIES.

Reports from Castries, St. Lucia Island—Sanitary conditions.

Acting Assistant Surgeon Maylie reports, August 6 and 13:

Week ended August 3, 1907. The sanitary condition of Castries is good. No quarantinable diseases exist.

Week ended August 10, 1907. Sanitary condition of this port and vicinity, very good. No quarantinable diseases exist.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—UNTABULATED.

AFRICA—*Lourenço Marquez.*—Month of June, 1907. Estimated population, 10,000. Total number of deaths, 56, including smallpox 7, beriberi 1, and 6 from tuberculosis.

ALGERIA—*Algiers.*—Month of July, 1907. Estimated population, 155,000. Total number of deaths, 284, including 1 from enteric fever, 19 from measles, 5 from smallpox, and 51 from tuberculosis.

BRAZIL—*São Paulo, Santos, and Campinas.*—Week ended July 7, 1907. Estimated population, 300,000. Total number of deaths, 183, including enteric fever 2, measles 1, whooping cough 2, and 12 from tuberculosis.

Week ended July 14, 1907. Total number of deaths, 194, including enteric fever 2, whooping cough 2, and 16 from tuberculosis.

San Salvador.—Month of January, 1907. Estimated population, 265,000. Total number of deaths, 394, including enteric fever 1, beriberi 5, plague 13, whooping cough 6, and 51 from tuberculosis. Month of February, 1907. Total number of deaths, 378, including enteric fever 1, beriberi 1, plague 10, smallpox 1, whooping cough 1, and 54 from tuberculosis. Month of March, 1907. Total number of deaths, 442, including enteric fever 3, beriberi 8, plague 1, whooping cough 1, and 60 from tuberculosis.

CUBA—*Cardenas.*—Months of May and June, 1907. Estimated population, 28,218. Total number of deaths, 193, including diphtheria 1, enteric fever 1, and 17 from tuberculosis.

Matanzas.—Ten days ended July 29, 1907. Estimated population, 49,990. Total number of deaths, 39, including 1 from tuberculosis.

Sagua la Grande.—Two weeks ended August 10, 1907. Estimated population, 22,634. Total number of deaths, 16.

FRANCE—*Cherbourg.*—Month of July, 1907. Estimated population, 43,948. Total number of deaths, 55, including diphtheria 1, enteric fever 2, measles 1, scarlet fever 1, and 11 from tuberculosis.

Marseille.—Month of July, 1907. Estimated population, 517,498. Total number of deaths, 961, including diphtheria 1, enteric fever 33, measles 9, scarlet fever 2, smallpox 98, whooping cough 2, and 124 from tuberculosis.

St. Etienne.—Two weeks ended July 15, 1907. Estimated population, 150,000. Total number of deaths, 104, including diphtheria 1, enteric fever 2, measles 1, and 17 from tuberculosis.

GERMANY—*Weimar.*—Month of July, 1907. Estimated population, 31,127. Total number of deaths, 51, including diphtheria 1 and 8 from tuberculosis.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended August 3, 1907, correspond to an annual rate of 11.7 per 1,000 of population, which is estimated at 16,024,458.

London.—One thousand and fifty-two deaths were registered during the week, including measles 46, scarlet fever 13, enteric fever 3, diphtheria 11, whooping cough 27, tuberculosis 132, and 18 from diarrhea. The deaths from all causes correspond to an annual rate of 11.5 per 1,000. In Greater London 1,511 deaths were registered. In the "outer ring" the deaths included 4 from measles, 4 from scarlet fever, 4 from diphtheria, and 12 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 3, 1907, in the 21 principal town districts of Ireland was 16.5 per 1,000 of the population, which is estimated at 1,117,547. The lowest rate was recorded in Sligo,

viz, 4.8, and the highest in Waterford, viz, 23.4 per 1,000. In Dublin and suburbs 138 deaths were registered, including diphtheria 2, measles 6, whooping cough 4, and 28 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended August 3, 1907, correspond to an annual rate of 12.8 per 1,000 of the population, which is estimated at 1,812,171. The highest rate of mortality was recorded in Dundee, viz, 17.3, and the lowest in Leith, viz, 10 per 1,000. The aggregate number of deaths registered from all causes was 445, including diphtheria 4, enteric fever 1, measles 6, scarlet fever 2, and 12 from whooping couhg.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 76 great towns in England and Wales during the week ended August 10, 1907, correspond to an annual rate of 11.8 per 1,000 of population, which is estimated at 16,024,458.

London.—One thousand and ninety-seven deaths were registered during the week, including measles 36, scarlet fever 19, diphtheria 11, whooping cough 24, tuberculosis 158, and 24 from diarrhea. The deaths from all causes correspond to an annual rate of 12.0 per 1,000. In Greater London 1,537 deaths were registered. In the "outer ring" the deaths included 6 from measles, 1 from scarlet fever, 2 from diphtheria, and 8 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended August 10, 1907, in the 21 principal town districts of Ireland was 15.5 per 1,000 of the population, which is estimated at 1,117,547. The lowest rate was recorded in Clonmel, viz, 5.1, and the highest in Newtownards, viz, 34.3 per 1,000. In Dublin and suburbs 118 deaths were registered, including diphtheria 1, enteric fever 1, measles 5, whooping cough 1, and 30 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended August 10, 1907, correspond to an annual rate of 13.8 per 1,000 of the population, which is estimated at 1,812,171. The highest rate of mortality was recorded in Greenock, viz, 16.1, and the lowest in Paisley, viz, 8.8 per 1,000. The aggregate number of deaths registered from all causes was 479, including diphtheria 2, enteric fever 3, measles 6, scarlet fever 2, and 30 from whooping cough.

HAWAII—*Honolulu.*—Month of July, 1907. Census population, 39,306. Total number of deaths, 72, including diphtheria 1, enteric fever 2, plague 1, and 14 from tuberculosis.

ITALY—*Genoa.*—Month of June, 1907. Estimated population, 273,000. Total number of deaths, 427, including diphtheria 4, enteric fever 2, measles 12, and 42 from tuberculosis.

JAPAN—*Formosa.*—Four weeks ended July 27, 1907. Estimated population, 3,080,000. Total number of deaths not reported. One death from diphtheria, 11 deaths from enteric fever, and 158 from plague.

MADEIRA—*Funchal.*—Two weeks ended August 11, 1907. Estimated population, 44,049. Total number of deaths, 50, including enteric fever 1, smallpox 8, and 5 from tuberculosis.

SPAIN—*Almeria.*—Month of July, 1907. Estimated population, 46,806. Total number of deaths, 119, including diphtheria 1, measles 18, smallpox 8, and 11 from tuberculosis.

Barcelona.—Ten days ended August 10, 1907. Estimated population, 600,000. Total number of deaths, 337, including diphtheria 3, enteric fever 2, scarlet fever 1, whooping cough 1, smallpox 4, and 20 from tuberculosis.

Cadiz.—Month of July, 1907. Estimated population, 69,382. Total number of deaths, 138, including enteric fever 3, measles 1, whooping cough 1, smallpox 5, and 25 from tuberculosis.

Malaga.—Month of July, 1907. Estimated population, 135,000. Total number of deaths, 279, including diphtheria 1, enteric fever 7, and smallpox 6.

Seville.—Month of July, 1907. Estimated population, 148,315. Total number of deaths, 384, including diphtheria 4, enteric fever 2, scarlet fever 6, whooping cough 2, smallpox 4, and 72 from tuberculosis.

Cholera, yellow fever, plague, and smallpox from June 28 to September 6, 1907.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State, and from other sources.]

[For reports received from December 28, 1906, to June 28, 1907, see PUBLIC HEALTH REPORTS for June 28, 1907.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
